

Birds Netting

Polymer Nylon Transparent Bird Net is a 100% effective bird deterrent providing a discreet and impenetrable barrier that protects the premises without harming the birds. Buildings, warehouses, airplane hangars, churches, barns, silos and more, thousands of facilities like these use Bird Net to keep birds and bats from roosting and creating health hazards. Bird netting is the strongest and most versatile bird exclusion system in the world. Bird net denies pest bird's access to literally any architectural configuration including courtyards, rooftops, overhangs, parking garages, etc. Bird net is a nearly invisible bird control product that comes in black, stone (beige) and translucent colors to blend with your structure. Our anti bird netting is particularly effective for large open areas such as roofs and loading bays as one anti bird net can be used to protect many perching places,
