

Monofilament Nylon Yarn

Sreema Filaments superior quality monofilament nylon yarn offers gauge consistency, tenacity, transparency, softness. Apart from these critical features an emphasis on wet knot strength, abrasion resistance and ease in handling & maintenance makes Sreema Filaments yarn delivers high catch factors. Sreema Filaments yarn are being used by many net manufacturers in India and as well as for Industrial fabric. Sreema Filaments Nylon yarn are engineered to meet all the required qualities for such applications. They are extra strong, exceptionally abrasion resistant, and easy to knot with better knot strength. Available colours Natural, Blue, Green, Brown, Yellow, Red, Smoke Grey, Other colours on request.

Range : 0.12 - 0.70 mm. / Resins: PA6, PA6/66

Standard Packages

Diameter	Put-up
Up to 0.16	Q - 130 (DOUBLE FLANGED BOBBINS)
0.20 - 0.50	Q - 65 (DOUBLE FLANGED BOBBINS)

Attributes

- Good tensile strength
- Good knotting strength
- Good softness
- Good sheen & transparency

It is also available in packing size DIN in DIN Bobbins 125,150 and 200

High tenacity yarns suitable for fishnet applications, ropes, fabrics, sewing threads, cycle tyre cords. Loads & stress strains adjusted to various end uses.

Special deniers such as 240/12 filaments are manufactured for specific requirements.

Parameter's	SREEMA FILAMENT
DENIER	435-440
DIAMETER	0.225-0.235
TENSILE STRENGTH	3.29
ELONGATION @ BREAK	24
SHRINKAGE	3.5-3.6
G/D	7.6
