

Sreema TRIMMER LINES are special premium monofilaments that are used for heavy duty grass and bush cutting.

This is the ideal line for all kinds of trimming, shaping and cutting jobs. The bright colours in which these lines are produced make the line clearly visible while cutting. Sreema trimmer lines are produced out of Nylon Co-polyamides which give them very high wear resistance and a long lasting cutting efficiency.

TRIMMER LINES are produce in round, square and star shaped profiles to offer the best cutting efficiency depending on the application and can be offered in retail and bulk packaging.
